

The GREASE policy framework

Category	Policy design questions
Governance	Who owns implementation and are agencies and partners set up to deliver?
Regional targeting	Where should resources be targeted so industry clusters grow and community benefits compound?
Expansive ambition	Is the tool scaled and durable enough to influence investment decisions and compete with peer states?
Accountability	How will results be tracked and the policy improved over time?
Sector strategies	Which sector-specific bottleneck is the policy solving and what do private sector companies building these electro-industrial technologies say matters most?
Environmental co-benefits	What public benefits (e.g., emissions reductions, clean energy deployment) are embedded?
