

A shrinking number of policies are being implemented while a growing number end or allocated their funding

Number of policies being implemented, allocating their funding, ending, or being suspended by year, 2022-2025

"Implemented" entries are based on the "implementation year" of policies marked "implemented" in the database.

For policies marked "concluded" or "cancelled," the year shown here is the same as the year shown in the database.

For policies marked "funding allocated" or "suspended," the year shown here is the year that the policy obtained that status (either because it allocated its funds or was suspended).
