

Turbine manufacturing employment clusters

This map measures the concentration of commuting-zone employment in NAICS 333611, Turbine and Turbine Generator Set Units Manufacturing, which encompasses gas, hydroelectric, steam, and wind turbine manufacturing. Manufacturing clusters pictured here offer a proxy for where geothermal turbine production may thrive, but related-industry employment is only one factor in manufacturing-site selection.

Commuting Zone Employment Concentration

Source data is current to 2024. Employment concentration level reflects binned location-quotient values. Location quotient captures industry employment share in an area relative to that industry's employment share nationwide.
