

Asian American and Pacific Islander women are overrepresented among the AAPI low-wage workforce

The bars show, out of all Asian American and Pacific Islander (AAPI) workers, the share of women paid low wages and the share of women employed in the workforce. For example, among South Asian workers, women make up less than half (42.4%) of the workforce; however, women make up over half (54.3%) of all South Asian workers who are paid low wages.

In 2022, the value of the low-wage threshold is \$19.69. The sample includes workers who live and work in California, were employed last week but not self-employed, ages 16+, and with non-zero earnings last week. See "Data and Methods" for the definition of each AAPI group.
